

# Megalink: Voice and Data Access

Get high capacity digital switched access at an affordable rate

Megalink provides your customers with a simple and affordable way to move to high capacity (64 Kbps to 1.544 Mbps) digital switched access. This integrated solution supports multiple voice and data applications, delivers high efficiency and flexibility, and includes a powerful set of call management features. Each single connection provides the equivalent of 23 access lines.

## Flexibility

Switch inexpensively and effortlessly from analog to digital lines to maximize communications. Enjoy the flexibility and cost savings of placing voice calls and transferring data via the same high capacity access line.

## A strategic backup plan

Emergency backup options, such as automatic call redirection, ensure that important communications are protected in the event of a disaster.

## Increased productivity

Better information exchange enhances organizational efficiency and increases your customer's workforce productivity.

## Wholesale-specific applications

Traditional Megalink services are available for resale to end users in the business market.

Megalink Service Extension provides for the backhaul of local services with DID's to a central customer POP location. Access is available from speeds as low as DS-1 and as high as OC-48. High speed access requires channelization to DS-3 accommodating a maximum of 28 Megalink circuits per DS-3.
