

# Bell Wholesale Toll service

## Created exclusively for Re-billers in Canada

Bell Wholesale Toll (BWT) service is a long distance solution designed for the re-billing of Bell-provided long distance calls. Created exclusively for the re-biller market in Canada, BWT enables re-billers to easily leverage one of the most extensive, robust and reliable telephone networks in the country to deliver toll service to their end users. Our service provides the detailed information necessary to enable re-billers to re-price customer-dialled long distance calls at their own rates.

### The solution

Bell Wholesale Toll offers:

- Long distance service over Canada's most robust, reliable, carrier-grade national network
- Complete Bell Wholesale Customer Support, with dedicated support staff
- Access to a secure web-based application to place orders, check order status, request billing or calling details, establish and manage account codes and much more
- Unique characteristics designed to meet the specific need of re-billers
- Re-biller branded 0+ calling cards

### Benefits

- Service delivery via a secure, web-based application for order entry
- Real-time service provisioning
- Next-day call detail reporting
- Competitive volume-based rates
- National scope

### Why Bell

Bell has been providing telephony services to Canadians for more than 130 years. We offer a depth and breadth of services to meet end-users needs' including voice, data, Internet, wireless, satellite, hardware and local access.

With Bell's information technology and communications services, re-billers have the ability to broaden their portfolio suite and expand their offerings to effectively grow their business.
