

# Basic Business Access

Receive simple, reliable, flexible and seamless service

When all you need is the quality and reliability of a Bell local line, use Basic Business Access. It provides simple, reliable, flexible and seamless service that can be customized with SmartTouch features. It can be used for telephone, fax or a modem connection.

Switching network facilities let you transmit voice and data at speeds of up to 64 Kbps using your own equipment.

Free listing in the Yellow Pages™ directory as well as in the business alphabetical section are included with Basic Business Access.

## SmartTouch Features

**Call Display** - Prioritize your important calls. See the name and telephone number of the person calling before you answer with Call Display.

**Call Waiting** - Conduct business on the phone without the worry of missing calls. You're alerted to local and long distance calls while talking on the phone.

**Call Return** - Let Busy Call Return monitor the line and alert you as soon as it's free.

**Three way calling** - Be more productive and make quicker decisions. Have a conference call with up to three people in three different locations.

**Call Forwarding** - Ensure clients and business contacts can always reach you. Transfer your calls to any number you choose.

## Wholesale-specific applications

Basic Business Lines provide a perfect solution for DSL or POS back-up.

Business Line bundles are available for resale to Small Business end users requiring basic service with features that accommodate their day-to-day needs.
